DOCUMENTARY HERITAGE & PRESERVATION SERVICES FOR NEW YORK

Black, White, and Read All Over: Addressing Newspapers in Collections

Gillian Marcus, DHPSNY Preservation Specialist Jennifer Palmentiero, Digital Services Librarian, Southeastern New York Library Resource Council Documentary Heritage and Preservation Services for New York is a five year initiative to deliver collections-related training, preservation surveys, archival assessments, and other services to the historical records community in New York.

DHPS NY

Documentary Heritage & Preservation Services

FOR NEW YORK

Website: dhpsny.org

Let's talk about:

- Common problems with newspaper collections...
- Why it's important to take action on deteriorating newspaper collections...
- And what you can do to take positive steps toward caring for your newspaper collections and preserving their information for the future!

Physical Deterioration in Newspapers

NDHAM HERA

the doubt.

Why Do My Newspapers Look Like Garbage?

Images: michiganlive.com, cecildaily.com

What Causes Physical Deterioration?

- Inherent vice raw materials
- Manufacturing
- Acidity
- Photolytic (light) damage
- Poor storage materials
- Poor storage environment
- Improper handling

Raw materials

Various stages of wood pulp

Newspaper Manufacturing

- Mechanical wood pulp has short fibers and a high lignin content, which promotes acid hydrolysis.
- Pre 1980s, wood pulp paper has alum-rosin sizing which generates sulfuric acid in the presence of moisture.

Acidity: Inherent and Environmental

- As it ages, cellulose in paper produces various acidic compounds
- Alum-rosin sizing generates sulfuric acid in the presence of moisture
- Paper can also absorb sulfur and nitrogen oxides from the environment
- Handling can leave traces of lactic acid (sweaty hands)

Neutral

Yellowing: Photolytic Damage

 Visible and UV light accelerates degradation processes in poor-quality paper, as well as causing changes in ink and paper colors (i.e. colored newspapers, such as the Financial Times)

Environmental Factors

Environmental Factors

Temperature and relative humidity

Pollution

Pest or mold damage

Light exposure

Temperature and Relative Humidity

Temperature

- □ 59-77 °F
- In general, the cooler the better to help slow degradation processes

Relative Humidity

- Ideally, 30-40% RH
- ...but for mixed-media
 collections, 45-55%
 (+/- 5%) is acceptable

 Avoid rapid fluctuations (more than 10% in a 24-hour period)

Controlling Your Environment Without an HVAC System

- Stand-alone dehumidifiers
- Window air conditioning units
- Dataloggers

Controlling Your Environment Without an HVAC System

- Staggering shelvesFans
- Sealing windows

Image: Library of Congress blog

Pollution

- Sulfur and nitrogen oxides in the atmosphere
- See: edges which are darker/yellower and more brittle
- Microclimates created in plastic storage bins or plastic bags

Bad Storage Happens to Us All

- Brittle newspaper crunched in a small space
- Plastic containers making a microclimate for acidic material

- Acidic storage
 materials
- Oversized newspapers bent and overhanging shelves

Good Storage Materials for Unbound Newspapers

Good Storage Materials for Bound Newspapers

Handling Damage

Good Handling Practices

- Bound newspapers should be supported with a book cradle or a book pillow.
- Newspaper pages should be turned slowly and carefully, making sure not to turn pages from the very edge (which tends to be more brittle.)
- Transport unbound newspapers in a folder, box, or on a cart so that they have a strong support.
- Ensure that the work space is large enough to accommodate the newspaper and that the edges don't hang over the side of the table or desk.

 Low visible and UV light levels in storage

IOBILE DAILY

Materials

Storage

• Buffered, acid-free and lignin-free storage materials

 Avoid sealed plastic boxes or bags

• Watch for brittle edges

- Take care when unfolding stiff, brittle folded newspapers
- Have a good handling policy in place for researchers and visitors

Newspaper Do's

- Keep independent dataloggers every place collections are used/stored/exhibited
- Limit the amount of light newspapers are exposed to
- Use supplementary dehumidifiers or air conditioning units when needed
- Good housekeeping and handling practices
- Buffered, acid-free, lignin-free storage materials

Newspaper Don'ts

- Don't let newspapers overhang a shelf or table
- Don't store newspapers rolled up for long periods of time
- Don't store newspapers in areas with high temperatures and/or relative humidity, or rapidly fluctuating temperature and/or relative humidity
- Don't put them in a sealed plastic container or acidic cardboard box

Miss Mary is of Pine street and Miss Mary liger of St. James Court are spenseveral days with friends in Ell
Mrs. James Intyre and daugh- ter, Miss Ro Intyre, of Clinton avenue, are s at the home of Philip Clearw f Ellenville.
Among the lest of the many parties who we for the coming of the new years the guests at The Huntington, ads were entertained from New YAlbany, Catskill and Middleburg.
Mr. and Mrank I. Cox, formerly of New Yorv, are moving into B R. Stare's 1 on Fair street. Mr Cox, who become associated with the M. C. D Company, will ente

upon his n ork next Monday.

-Mrs. H. A. Rose departed for hen home in New Decautor, Alabama, on. Monday morning after an extended stay in Ceres.

Mrs. L. Ingraham of Shingle House, and daughter, Miss Amy B. Ingraham of Short Hills, N. J., visited among Ceres friends on Monday.

Mr. and Mrs. Clarence Bissell have returned from Rochester, and are now "at home" to their numerous friends. They, arrived Saturday morning.

A Gaad Dessert.

Souffie of Apples With a Border of Rice .- Prepare the rice in cream, etc., as for rice cake, and keep it of a strong, solid substance. Dress it round a buttleved dish about three inches high; give it a nice shape, level and smooth. Have ready an apple marmalade, very thick Mix with it form volks of errs-well beaten, a small piece of builder and a pinch of sallt; warm it upon the store; then take the whites of four eggs well whipped, mix very lightly with the marmalade, put the whole in the middle of the rice and sett im a moderately beated oven. When the souffle rises high send in to table at once or it will fall. Some coals hold a salmmander over it just holison inking into the room

"Well, I don't know," readied the other; "they does small bloody run things sometimes-these here Injuns."

"When he come, Anoongezh g? When he Inlian summer come? You tell me that. Me got heap morec!" (Jamaica rum).

"He come, next day, morrow, sun so high." And he pointed as he spoke to the manith.

"He come, maybe ?" a kel Forester.

Washington, Jan. 1 .- A silver loving cup, sent from Postmaster General Frank H. Hitchenck on Postmanter E. M. Morgan of New York city, at midulaht, marked the advent of the new year. This is the first place of mail sent through the mails under the provisions of the new parcels post law, which because effective today. At the same moment the serthe was opened for husiness in every postoflice in the United States. The cup as an emblem of the innothe createst institutions of the postolice astablishment, will be suitably engraved after its reception by Postmaster Morgan and deposited in the national masseum, where the postoffice department now keeps its other relies and C127516.
